# W1 AIR – Industrial compressed air vacuum cleaner for dusts, liquids and solids

INDUSTRIAL VACUUM CLEANERS

## **SUCTION UNIT**

---

Suction is generated by one Venturi air vacuum unit enclosed in a solid steel head containing sound-absorbing material. This minimises noise during operation.

## **FILTERING UNIT**

---

The polyester star filter, placed inside the filter chamber, guarantees a large filtering surface area and high resistance to dust passage and clogging.

## **COLLECTION UNIT**

---

The steel container is equipped with a quick release system that allows for quick disposal of the vacuumed material.
